

Renew your Infrastructure through Guaranteed Savings

Schools are turning to Honeywell's Energy Savings Performance Contracting (ESPC) program to fund infrastructure improvements. This approach addresses facility renewal and capital needs while allowing administrators to focus on their core mission of educating children.

ESPC PROGRAM BENEFITS

- Enhance the learning environment for students and staff
- Fund critical projects that would be postponed or neglected
- No up-front cost to implement; Projects are self-funded through energy and operational savings
- Modernize facilities to increase comfort and efficiency
- Guaranteed savings by Honeywell throughout the life of the program
- One single point of responsibility for design, engineering, construction and post installation performance monitoring
- Demonstrate environmental responsibility through energy efficiency, emissions reductions and renewable energy technologies.

COMPREHENSIVE FACILITY SOLUTIONS

Few companies in the world have been more focused on enhancing the performance of buildings than Honeywell and we maintain that status by listening closely to our customers. Our facility experts work collaboratively with your school's leadership team to design a program that supports your district's priorities and long term facility plans.

You can trust the dedicated energy experts at Honeywell to work with you and your staff to find the optimal mix of technology and services to support your environmental and budgeting goals.

A TRADITION OF INNOVATION AND ENVIRONMENTAL STEWARDSHIP

Honeywell is recognized as a global leader in energy management technology and services with over 30+ years of experience in Energy Performance Contracting. More than 50 percent of Honeywell's portfolio of products is directly linked to energy efficiency.
