HONEYWELL PROVIDES INNOVATIVE SOLUTIONS TO HELP DELIVER THE HOSPITAL OF THE FUTURE

- *Honeywell’s ‘Digital Health Enterprise’ presented at Hospital Build and Infrastructure Conference*
- *Increasing Healthcare Investment Drives Need for Safe, Reliable and Efficient Healthcare Operations*

Dubai, U.A.E., June 2, 2014: With many internationally acclaimed healthcare institutions opening across the Gulf, Honeywell’s (NYSE: HON) end-to-end solutions are helping the region to develop the most technically-advanced facilities in the world and deliver the hospital of the future.

Honeywell will showcase its Digital Health Enterprise, a system to support a more efficient, higher quality of patient care and hospital operations, from June 2 to 4 at the Hospital Build and Infrastructure Conference & Exhibition held in Dubai, United Arab Emirates. The Digital Health Enterprise provides a holistic approach to hospital management that uses technology and digitization to enhance safety, improve hospital care, and enable customized healthcare offerings.

Increasing public investment into healthcare, such as the Dubai Health Authority’s recent pledge to build 22 new hospitals before 2020 to attract medical tourists, has highlighted the growing impact of the healthcare industry on the region’s economy.

“Throughout the Middle East and across the globe, Honeywell is helping hospitals and other healthcare institutions to face the tough challenges around efficiency, safety, security and productivity,” said Norm Gilsdorf, president of Honeywell High Growth Regions Russia, Central Asia and Middle East. “The Digital Health Enterprise is very exciting for Honeywell, as we see more hospitals seeking ways to improve patient through-put, enhance operational efficiencies and ensure patient safety.”

Throughout the three-day event, Honeywell will be delivering seminars on the Digital Health Enterprise and the future of healthcare, instigating discussion around the importance of early engagement in the design, planning, and procurement, through to the integration of clinical and non-clinical solutions.

In addition, the Honeywell stand will have a variety of system demonstrations, including:
• Nurse Call systems, which offer a combination of vital sign monitoring and precision point-of-care services for improved patient workflow and safety
• Honeywell healthcare app, which simulates the patient's journey throughout a hospital highlighting how technology optimizes patient workflow and enhances the patient experience
• The latest innovation from Honeywell building technologies, an intuitive touch-screen interface that empowers hospital owners and operators to realize the power of integration by connecting, collaborating and controlling their entire hospital through workflow management.

With more than 40 years of experience in healthcare facilities across the globe, Honeywell understands the complex, competitive and often highly regulated world of healthcare, and has a demonstrable track record of providing universal and customized solutions for the healthcare industry.
