

Instant Alert® for Schools

**Connect Schools and Parents Rapidly
and Effectively**

Honeywell

Honeywell Instant Alert® for Schools Enables Schools to:

- Notify parents and staff rapidly, consistently, and effectively during a critical situation
- Target messaging to those who need it by creating unlimited communication groups
- Access reports for up-to-date information about phone call receipt
- Rely on an off-site cloud-based solution for a truly virtual emergency notification system

Be Prepared For Any Situation

Honeywell Instant Alert for Schools is an essential tool for notification and communication. Within minutes of an emergency, school officials can use Instant Alert to deliver a single, clear message to parents, guardians and staff by phone, smart phone, email, SMS, pager and social media in any combination. It's an equally effective way to keep parents informed of everyday activities, such as event reminders, schedule changes, and student attendance.

Emergencies and unexpected changes to school events can't be avoided. Now schools and parents can count on Instant Alert to deliver important information without delay. That's peace of mind for everyone – and a big step toward a safer, more secure and more effective learning environment.

Improve Communications

The ability to communicate using a variety of devices simultaneously speeds delivery and increases the likelihood that the message will get through. Customized messages can be quickly created and

updated in real-time for any situation, student or group, then delivered only to the appropriate families and individuals.

Save Time and Resources

Instant Alert is an efficient way to communicate with parents and staff because it eliminates the time associated with manual phone tree communication. Using the email file attachment feature reduces paper communication costs as well as your environmental footprint. This allows staff and funds to be focused on their true purpose – educating children.

Improve Safety, Reduce Risk

Messages can be prepared beforehand to handle any emergency or routine situation, allowing a swift response when seconds count. When parents, staff and emergency personnel receive timely information, the likelihood of their responding accurately increases, creating safer environments for everyone.

Because Instant Alert is hosted at secure off-site locations, you won't have to worry about expensive upgrades or maintenance. In addition, your ability to contact parents and staff is ensured even if your facilities are impacted.

Improve Parent Involvement

Parents have the option to easily access a secure website to enter contact information and select how they wish to receive messages. They can choose any combination of devices (phone, email, SMS or pager) and can assign different devices for urgent versus routine messages. Parents' increased awareness of their child's school activities, attendance and performance promotes a healthy home/school relationship, which can improve learning.

Peace of Mind

More timely, consistent and accurate information, especially in an emergency, provides assurance that each child is being cared for. As Honeywell's proven track record of thousands of successful Instant Alert installations shows, rapid and intuitive communication is our top priority. Whether you are responsible for the security of children at a daycare center, private school or large public school district, Honeywell has a communication solution that can safeguard your children and staff – and make your job easier. Make sure communication on your watch is handled with the timely, accurate information exchange of Instant Alert for Schools.
